

TRAFFIC TECH

Civil Engineering & Traffic Technology

PRODUCT DESCRIPTION:

Indect Spare Parts: Traffic Tech offer the full range of Indect Spare Parts for all UMS, USS and Absolut Parking Guidance Systems (PGS). These simple, yet state of the art systems optimize your car park management and guide your customers faster to their destination – a vacant parking space!

Supply and Maintenance: Traffic Tech can design and install your Indect PGS and once installed we can ensure your PGS continues to work efficiently by regularly monitoring and maintaining your system as required.

FEATURES:

Indect PGSs are innovative and custom designed with flexible solutions to comply with your particular car park whether it be a shopping centre, airport or other parking facility.

Installation is easy and professionally carried out by Traffic Tech technicians, all fully trained in Indect services.

The Indect system also features user-friendly administration software, which permits you to monitor and control virtually every parking action from a central console.

BENEFITS:

Installing an Indect System in your facility, benefits you by giving your customers an enhanced parking experience while in your car park. Continuous advancements combined with Indect's passion brings you a competitive advantage with your optimised space administration to increase your car park occupancy significantly. Parking has never been so easy—both for you and your customers.
